Body by Vi™ Challenge goals can be (or include) weight-loss, building lean muscle or improving energy and endurance. Every participant should consider his or her personal circumstances and create goals that are both reasonable and achievable. ViSalus™ discourages rapid and extreme weight-loss, which can actually be unhealthy and emphasizes that safe and sustainable weight-loss is never achieved without exercise and sensible eating. Persons with preexisting medical conditions should consult a health care professional before embarking on any fitness, health or weight-loss program.
